

A diabetes workshop in your school!

The more you know, the better your students' control
Control Type 1, LLC

An interactive, stimulating diabetes education workshop geared towards school nurses. It will give you the knowledge and tools necessary to confidently help students with diabetes!

- **4 continuing education credits**
- An update on diabetes management in the school setting
- Access to valuable educational resources
- Carbohydrate counting, basic and advanced
- Stress and psychosocial issues
- Potential complications
- Insulin pump and technological advances
- Much more!

Effective management of children with diabetes at school is crucial, so please contact me to schedule a workshop for the 2010 school year. The workshop can be scheduled as a professional development day or at any other convenient time.

Many school nurses have completed the workshop and have been very pleased with the education provided....

"The nurses found the workshop to be extremely informative providing them with an in-depth knowledge of managing students with diabetes in the school setting"

"I have been to numerous school nurse workshops and no speaker has kept my interest the entire 4 hours. The workshop was actually fun!"
